Monthly Worldwide Internet Performance Seen From SLAC

MEASURING THE GRID
The Particle Physics Data Grid, and other scientific and commercial communities will increasingly require high performance networking beyond the cutting edge. Measurement is critical to understand emerging bottlenecks.

SLAC and Fermilab have been leading world-wide, continuous end-to-end performance measurements since 1998. The results are presented below.

SLAC and Fermilab performance measurements can be accessed at:

http://www.slac.stanford.edu/csslac/gymnet/

http://www.fnal.gov/cms/psneta/

http://www.cern.ch/oepp/psnet/

The data is updated daily. Please contact the data providers for a current status.
